

Welcome to our E-News for June 2010

We hope you find products of your interest and if you like more information please call or write to us at +45 46 900 400 or sales@acte.dk

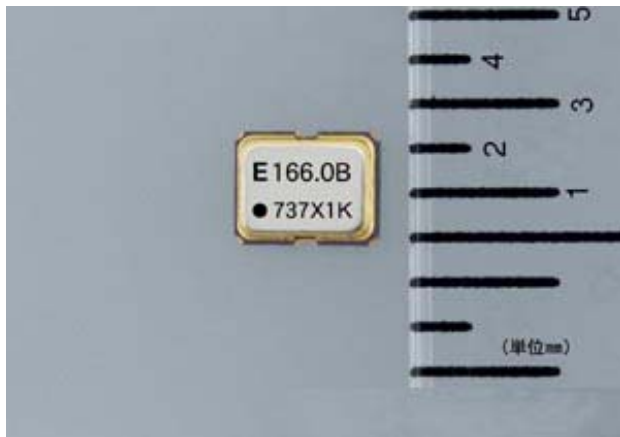

ACTE in Denmark wins Schurter Nordic "Most Valuable Player 2009 Award"

We are very proud to announce that ACTE has won the "Most Valuable Player 2009 Award" for the outstanding efforts to find new business and promoting the Schurter brand in Denmark.

Monica Noordman, Technical Product Manager at ACTE: "Winning this award means a great deal to ACTE as it demonstrates that with focus and dedication, success can be achieved even in a challenged marked. We are happy to proceed and continue our support to our customers".

SCHURTER is a progressive innovator and manufacturer of fuses, connectors, circuit breakers, input systems, EMC products and manufacturing services for the electronics industry, with focus on components that ensure safe supply of power and make the interface between human and machine easier.

EPSONTOYOOCOM SG-8003 serie of programmable Oscillators, now in stock

The SG-8003CE series, which supports voltages down to **1.8V and 2.5V** and up to **166 MHz**, fills the low-voltage, high-frequency needs that **Epson Toyocom's** highly popular SG-8002 series of programmable crystal oscillators, released in 1997, could not. Moreover, the new programmable crystal oscillators not only support low voltages, they consume **50% less current** than their predecessors, making them an excellent choice for a wide range of mobile devices and other equipment where low power consumption is critical.

FTDI Vinculum VNC2

Programmable dual USB 2.0 full speed Host / Slave controller with integrated microprocessor core, on-chip Flash and RAM memory. VNC2 comes with pre-compiled firmware images for common USB applications as well as support for user application firmware through the Vinculum Software Development tool suite.

Piezoresistive Type Waterproof MEMS Pressure Sensor Absolute "HSPPA series" from EAO

Features

- World's smallest class realized in a compact size $\phi 3.95 \times 1.85 \text{mm}$

- Supports up to 20 atmospheric pressures in a waterproof package.

Applications

- Altitude / atmospheric pressure detection in mobile phones, portable navigation, pedometers and other mobile equipment.

- Water / hydraulic pressure detection in divers watches, digital still cameras, and digital camcorders.

Read this and other news from EAO.

EAO M.series 'Axess' has a unique design advantage over other keypads: the standard product can be quickly adapted to suit the look and feel of any piece of equipment without the need for additional tooling. In this way, OEMs get a product that looks bespoke but without a costly design process - only the M.Series can do this.
