Noritake-Itron Linux TFT Development for iSmart

Developers with Linux experience and existing projects will be able to take advantage of our Linux option. We provide the itron SMART TFT with integrated Boot, File Handler and Kernel which allows users to upload their application written in C and compiled with the free Buildroot. This is loaded into internal NAND flash from SD card and then run from NAND at power ON.

HCP hit Family of GSM, GPRS and EDGE modems

This is easy-to-use quad band GSM/GPRS/EDGE and triple band UMTS/HSDPA modem that enables data, fax and SMS applications. Standard interfaces as well as an integrated SIM card reader shorten installation time significantly. The functionality of the modem corresponds to the features of the CINTERION HC25 wireless module, supplemented by SIM card reader, an USB interface.
